

Application and Tech Info

INOX MX-3

The only lubricant in the world with the special MX-3 anti-corrosion, anti-moisture formula for the Twenty-First Century.

INOX MX-3 contains no silicon, acid, kerosene or diesel.

INOX MX-3 will not harm metal points or surfaces, plastics, paints, enamels, fiberglass, Formica, or neoprene seals.

INOX MX-3 doesn't dry out, gum up, become goeey or sticky or wash off with water.

INOX MX-3 is non-conductive, non-static, non-toxic, non-corrosive, and non-staining.

APPROVALS

Food Grade – USDA, FDA, Kosher

Australia: Australian Government Instrument of approval is freely available on request

N.A.T.O. Defense Manufacturers Code No. Z5594/5 (R.A.N.App.)

Sizes: 100 & 300g Aerosol, 125 ml Pump Pack, 5, 20, 205 liter containers, A 500 ml spray applicator comes with each 5 and 20 liter, and 6 with the 205 liter. Screw in taps are supplied with each 20 and 205 liter.

The applications for INOX MX-3 are very numerous. It is suitable for all industries and below is a partial list of uses.

APPLICATIONS AND USES:

Common Everyday Uses: All domestic type use, aluminum sliding doors and windows, door locks and hinges, garage roller doors, bicycle chains and cables, skate boards, and roller blades, shower screens and curtain tracks, sewing machines, etc.

Furniture Polish: INOX MX-3 is good as a furniture polish for polished wood surfaces. It will clean and polish stainless steel sinks (use a plastic 3M type cleaning pad). INOX MX-3 will clean and polish fiberglass (use toweling or cheese cloth).

Lubricant: INOX MX-3 doesn't gum up, become sticky or goeey, **doesn't dry out or wash off with water.** Other WD type sprays because of their solvent base tend to evaporate quickly, where INOX MX-3 because of its lubricating oil base will last much, much longer. INOX MX-3 will keep door locks, hinges, sliding doors and windows, skate boards and roller blades, bike chains, garage roller doors, etc. working like new for months on end.

Penetrate: INOX MX-3 will readily penetrate the severest of corrosion and free up nuts, bolts, screws, threads, pins, bushings, bearings and parts from rust and corrosion and help keep them in good working order.

Fishing Tackle: INOX MX-3 will keep fishing reels corrosion free and in good working order. INOX MX-3 will not affect fishing lines, protects fishing rods, keeps hooks, swivels, and lures corrosion free and in good condition. INOX MX-3 will not dry out or wash off with water. **INOX MX-3 WILL NOT TAINT BAIT.**

Sporting Equipment: INOX MX-3 sporting applications include pistols, rifles, and shotguns, golf clubs and carts, BMX and motor bikes, Go Karts, boating (both power and sail), off road vehicles. Use INOX MX-3 to clean, lubricate, and protect all the above.

Power and Hand Tools: INOX MX-3 will keep all air and electric powered tools clean, corrosion free and well lubricated. INOX MX-3 in the non-aerosol form can be sprayed directly into electric power tools to reduce bearing noise. Keep spanners, wrenches, planes, hammers, saws, etc. clean and in good working order. Use INOX MX-3 on oil stones when sharpening chisels, plane blades and knives

Lawn, Yard, and Garden: INOX MX-3 can be used to lubricate and clean wheel barrow wheels, pruning shears, chain saws, garden tools, all lawn mowers and weed eaters. INOX MX-3 helps stop lawn clippings sticking to the underside of mowers. Use INOX MX-3 to protect and lubricate children's play equipment and swings, pool pumps, gate latches, locks and hinges. Cleans and protects TV and radio antennas.

Marine: Use INOX MX-3 to lubricate and protect from corrosion battery terminals, wiring, switches, lights, bilge pumps, outboard motors, alternators, starter motors, winch and control cables. Helps keep radios and radar antennas and equipment free from corrosion. Lubricate sail tracks (will not stain sails), sliding hatches, locks and hinges.

Application and Tech Info

Page 2

INOX MX-3

Stops Electrolysis: INOX MX-3 lubricates and frees door locks and hinges, control cables and linkages, starts wet motors. Frees up nuts, bolts and parts frozen with rust and corrosion (exhaust manifolds and pipes, suspensions, etc.). Cleans and polishes vinyl dashes and upholstery. Spray INOX MX-3 across the front of the vehicle when traveling long distances at night in the country, it will make it easier to remove the bugs and insects the next day.

Commercial: INOX MX-3 is used for the repair and servicing of air conditioners, office equipment, ride on mowers, chain saws, welders, woodworking and laminating machines, air and power tools, etc. INOX MX-3 stops computer keyboards from sticking. Keeps electrical and electronic plugs, connectors, micro-switches, terminals, circuits, power boards, solenoids and switch gear free from corrosion and in good working order. Lubricates CPU fans (computers).

Farming: Use INOX MX-3 to lubricate and protect from corrosion, PTO splines and couplings, sprockets, chains, irrigation pump motors, windmill gears and linkages, electrical systems, starter motors, generators, alternators, relays, solenoids, battery terminals, shearing hand pieces, overhead gears and drive shafts, winches and cables. Frees up corrosion and rust frozen parts, tarack and blade bolts, exhaust systems, nuts, bolts, pins, bushings, and pin bearings.

Transportation: Use INOX MX-3 to lubricate and protect air brake slack adjusters and linkages, roller doors, side curtain tracks, door locks and hinges, air and electric start motors, wiper motors and linkages, alternators and air horns. Use INOX MX-3 to protect and give longer life to brake, tail and clearance lights, relays, battery terminals, solenoids, wiring, electrical and air hose connectors. Use INOX MX-3 for repair and service work on fuel injectors and pumps.

Industrial: INOX MX-3 is Food Grade approved, the Australian Government Instrument of Approval is freely available on request. Use INOX MX-3 to stop corrosion and give protection to cold room fan motors, electric forklift systems, switches, relays, solenoids, wiring and motors in high moisture areas. Lubricate and protect pneumatic systems and solenoid valves, factory roller doors, sea container latches and hinges. INOX MX-3 is very good for cutting and milling aluminum, stops tool chatter. Use INOX MX-3 for tapping and thread cutting. Protects blow moulds, dies and printing plates.

F.A.Q.'s on INOX MX-3

What is INOX MX-3? INOX MX-3 is a Food Grade Approved anti-corrosion, anti-moisture lubricant.

What makes INOX MX-3 different to other WD type sprays? INOX MX-3 is made using a high grade machine oil base, contains no silicon, acid, kerosene, or diesel. WD type sprays use a kerosene or solvent base.

Is INOX MX-3 safe to use? INOX MX-3 has no toxic additives. It is Food Grade Approved and contains no carcinogens

Why is INOX MX-3 superior? INOX MX-3 will replace over 14 products with just one can

CAUTION: INOX MX-3 may affect some natural rubber products with continual long term use (refer to MX-4 LANOX)

THE INOX FINGER TEST

This is a very simple test to show the quality and durability of INOX. On the first finger of one hand, spray WD-40, CRC 5.56, RP7, or any one of the other WD type products and rub the finger and thumb together vigorously. On the first finger of the other hand, spray INOX and rub the finger and thumb together the same way. After about 20-30 seconds, the finger that has been sprayed with the WD type spray will start to become dry and lose its lubricating ability whereas the finger that has been sprayed with INOX will continue to stay wet and slippery.
