

Template Guidebush System Selection Chart

IMPORTANT: Check the make and model of your router in column 1. Where possible, always order the Leigh adaptors and template guidebushes (indicated in red), which are specially designed for use on Leigh jigs. Leigh also sells other manufacturer's adaptors and template guidebushes (indicated in green). All others must be purchased from the router manufacturer's own distributor. **NOTE: If your router is not listed here, visit leighjigs.com for a complete, up-to-date list of routers.**

WEGOMA	OF850 Series	710	711TP or e7	716TP	YES

Note: Adaptor mounting screws are provided with router. ▼ 5/8" O.D. guidebushes are used only with 1/2" shank router bits. ■ MAFELL - Reswork the adaptor slightly. ★ Leigh Adaptors 702, 702R, and 703 may require a small lug to be "drilled out" to use the e7 guidebush. Note: Ideal barrel depth is 1/4" to 9/32" (6mm to 8mm) below the router base. Other manufacturers' guidebushes may require careful cutting to length. All Leigh guidebushes have 9/32" long barrels.
