DOMINO Connectors

joinery. unmatched.™

DOMINO CONNECTORS - Wood joining, simple, quick, stable and detachable.

Break through the limits of shop-built pieces and on-site construction with the use of knock-down hardware. Create, build, and finish full-sized constructed pieces, then quickly disassemble, move, and then reassemble with only a hex wrench. Domino fasteners work with the Domino XL (DF 700) Joiner to create flat or corner joints. Corner and flat connectors provide simple and quick connections without the need for templates or complex measuring. Colored cover caps provide high-quality corner connection appearance. Available as a set and individual components. Requires 14mm cutter.

Fast - Quick and simple machining processes with the Domino Joiner provide the basis for rapid assembly of flat and corner joints utilizing Domino fasteners for knock-down design. Allowing for rapid building, moving, and reassembling of large pieces.

Stable - Based on the Domino mortise-and-tenon principle, joints made with the Domino joiner benefit from the design of the oblong mortise and mating tenon and the knockdown metal fastener is robust with high connection strength.

Flexible - Connect frames, panels, tops, and other large joints and pieces and easily disconnect and reconstruct as needed.
