

PRODUCT INFORMATION

FastFix Depth Stop

For all cordless drill drivers with FastFix

Item No. 493539

PRODUCT DESCRIPTION:

The Depth Stop works with an integral clutch that maintains the preset depth. This means the screw depth isn't controlled by a torque control, so all screws will be set to the same depth. With the "Quick-out" ring, screws can be removed with the flick of a wrist. Bit changes are fast and easy. The Depth Stop can be used with all Festool cordless drills and fits perfect into the FastFix chuck family.

SUGGESTED USAGE:

The Depth Stop converts your cordless drill in seconds for accurate depth setting in drywall, decks, fences or other where depth control is important.

BENEFITS:

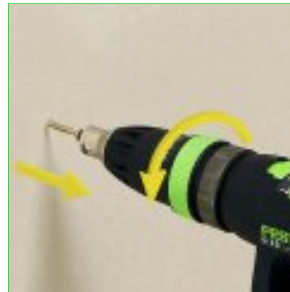

- The precise mechanical setting of the Depth Stop controls the depth perfectly regardless of the material density. Get perfect results, eliminate reworking, save time.
- Change bits in seconds, save time.
- "Quick-out" ring let's you back-out screws quickly and simply. No need to change depth setting. Save time, get perfect results.
- With the unique FastFix Interface System you can now add a Depth Stop to your cordless drill, saving time and making your drill more versatile.

RELATED PRODUCTS:
